

Excavation Site Report

Client: Demo data - privacy protected · Excavation site documentation

Visit Date: 28 September 2026, 8:00 AM – 9:45 AM

Generated by: AI report assistant, from a Preserver field export

Summary

An excavation site documentation session was carried out on-site, covering an artifact recovery and identification check, a finds cataloguing and condition check, and a field log and context notes review. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Artifacts were recovered and identified against the context reference, finds were catalogued and their condition confirmed suitable for transport, and the field log and context notes were reviewed and checked for completeness before submission.

Excavation Summary

Category	Observation	Status	Action Required
Artifact Recovery	Identified against context reference	Complete	None
Finds Cataloguing	Catalogued, condition suitable for transport	Complete	None
Field Log Review	Checked for completeness before submission	Complete	None

Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Artifact — recovery and identification

-27.4715, 153.0219 · 28 Sep 2026, 8:12 AM

Pottery artifact recovered on-site, identified against the context reference.

Finds — cataloguing and condition check

-27.4715, 153.0219 · 28 Sep 2026, 8:48 AM

Finds catalogued at the desk, condition confirmed suitable for transport.

Field log — context notes review

-27.4715, 153.0219 · 28 Sep 2026, 9:20 AM

Field log and context notes reviewed, checked for completeness before submission.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
8:12 AM	Voice	"Artifact's recovered and matches up with the context reference for this square."
8:48 AM	Voice	"Finds are catalogued, condition's good, ready for transport to the lab."
9:20 AM	Text	Field log and context notes reviewed and checked for completeness before submission.

Site Visit Log

8:00 AM	Activity started on-site — GPS lock confirmed, excavation location
8:12 AM	Artifact recovery check — photo + voice observation logged
8:48 AM	Finds cataloguing check — photo + voice observation logged
9:20 AM	Field log review — photo + text observation logged
9:45 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the dig day, turned into a lab-ready submission the same day it was captured.

Preserver

Free to capture. Record your observations — photo, video, voice or text — with GPS and timestamp on every entry. Export anywhere, including straight to AI. preserver.me
