

Bookkeeping Reconciliation Report

Client: Demo data - privacy protected - Monthly reconciliation visit

Visit Date: 28 September 2026, 9:00 AM – 10:05 AM

Generated by: AI report assistant, from a Preserver field export

Summary

A monthly bookkeeping reconciliation was carried out on-site, covering an invoice and receipt reconciliation, a spreadsheet and ledger review, and archived financial records filing. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Invoices and receipts were reconciled against the ledger with no discrepancies found, spreadsheet figures were reviewed and confirmed to match source documents, and financial records were filed and archived in order.

Reconciliation Summary

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the reconciliation, turned into a client-ready report the same day it was captured.
