

Case File Evidence Report

Client: Demo data - privacy protected · Case preparation file review
Visit Date: 28 September 2026, 8:30 AM – 9:45 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A case preparation review was carried out covering a legal reference and precedent check, a contract and document review, and archived case file retrieval. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Relevant statutes and precedent were confirmed against the case reference material, the contract document was reviewed with key clauses noted for discussion, and the archived case file was retrieved and confirmed complete ahead of the next hearing.

Case Review Summary

Category	Observation	Status	Action Required

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the case preparation, turned into a client-ready report the same day it was captured.
