

Tour Day Report

Client: Demo data - privacy protected · Guided day-tour excursion
Visit Date: 28 September 2026, 7:00 AM – 3:30 PM
Generated by: AI report assistant, from a Preserver field export

Summary

A guided day-tour excursion was carried out on-site, covering a gear and safety-briefing check, a route and waypoint check, and an end-of-tour wrap-up and guest feedback check. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Gear was checked and the safety briefing delivered to all guests before departure, the route was followed with waypoints confirmed along the way, and the tour concluded with a wrap-up and positive guest feedback recorded.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the tour, turned into an operator-ready file the same afternoon it was captured.
