

Preserver for Asbestos Assessors

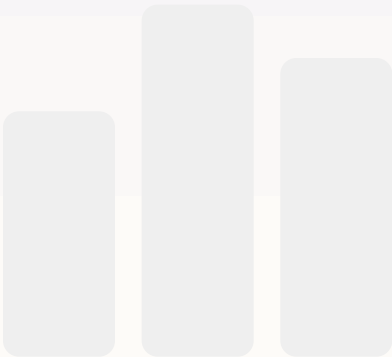

GPS-tagged sample locations and site photos - AI drafts the asbestos register.

Why **Asbestos Assessors** Need Preserver

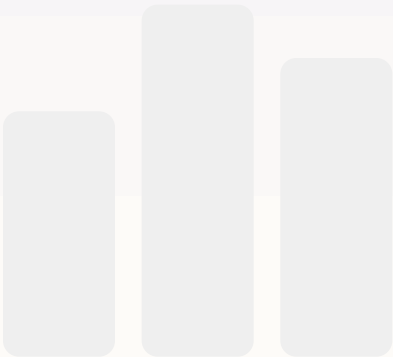

Asbestos assessments carry strict regulatory reporting obligations. Preserver captures GPS-tagged sample locations, timestamped site photos and voice observations - and the AI-ready export turns a day of assessment into a draft register or report.

The Problem

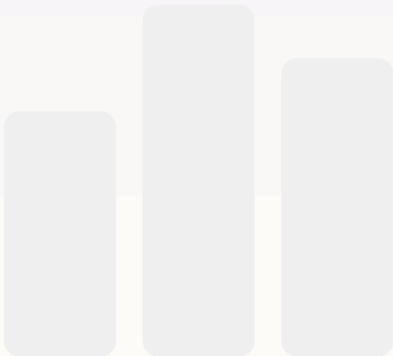

Strict reporting obligations, PPE that makes note-taking painful, and sample locations that must be beyond doubt. The register still has to be written when you get back.

The Solution

Every photo, video, voice note and text is automatically stamped with time, date and GPS at the moment of capture - offline, via satellite. Hash-verified. Nothing editable after the fact.

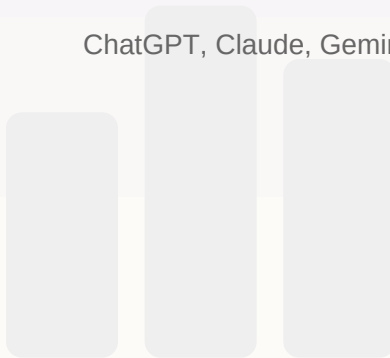

Field to Report

- 1. Capture as you work**
- 2. Auto-stamped - time, date, GPS**
- 3. Export the AI-ready bundle**
- 4. AI writes your asbestos register**

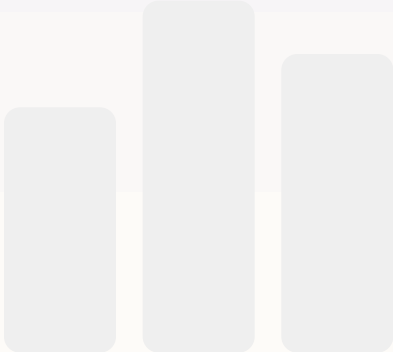

ChatGPT, Claude, Gemini or Grok - grounded in your verified data.

What You Capture

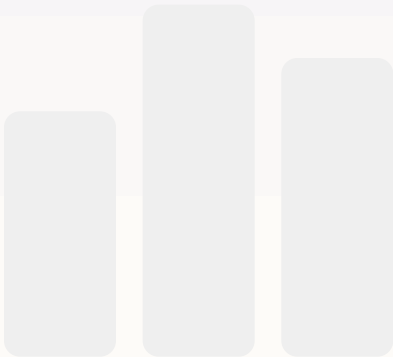

- GPS-tagged sample and suspect-material locations
- Timestamped site condition photography
- Hands-free voice notes while in PPE
- AI-ready export - register drafted from your data
- Works offline in ceiling spaces and remote sites

AI Exports **Free** in Beta

Early users keep them free forever. Capture is free for everyone, always. We never train AI on your data - you choose which AI sees it.
