

Paddock Condition Report

Client: Demo data - privacy protected · Rural property walk
Visit Date: 28 September 2026, 6:15 AM – 7:30 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A paddock condition walk was carried out at the property, covering the north sorghum block, a crop health check for pest and nutrient stress, and the irrigation system status. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

The north block showed strong even growth overall, a section of leaf yellowing and minor pest damage was identified and flagged for closer monitoring, and the irrigation control panel and soil moisture probe were confirmed operating correctly.

Field Summary

Category	Observation	Status	Action Required
North Block Growth	Even, healthy growth across most of the paddock	On Track	None
Crop Health	Leaf yellowing and minor pest damage in one section	Attention	Monitor, consider spot treatment
Irrigation System	Control panel and soil moisture probe operating correctly	On Track	None

Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

North block — sorghum crop

-27.6412, 152.0987 · 28 Sep 2026, 6:22 AM

Wide view of the north sorghum block showing healthy, even crop growth.

Crop health — leaf inspection

-27.6410, 152.0985 · 28 Sep 2026, 6:48 AM

Leaf yellowing and minor pest damage noted in one section of the block, flagged for monitoring.

Irrigation — control panel check

-27.6408, 152.0982 · 28 Sep 2026, 7:15 AM

Irrigation control panel and soil moisture probe checked and confirmed operating correctly.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
6:22 AM	Voice	"North block's looking good overall, nice even growth across most of it this morning."
6:48 AM	Voice	"Found a patch with some yellowing leaves and a bit of pest damage — not widespread yet but worth keeping an eye on."
7:15 AM	Text	Irrigation control panel and soil moisture probe checked, both operating correctly.

Site Visit Log

6:15 AM	Activity started on-site — GPS lock confirmed, property address
6:22 AM	North block walk — photo + voice observation logged
6:48 AM	Crop health check — photo + voice observation logged
7:15 AM	Irrigation check — photo + text observation logged
7:30 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the paddock walk, turned into a farm-ready report the same day it was captured.

Preserver

Free to capture. Record your observations — photo, video, voice or text — with GPS and timestamp on every entry. Export anywhere, including straight to AI. preserver.me
