

FIFO Site Arrival Report

Client: Demo data - privacy protected · Remote site arrival
Visit Date: 28 September 2026, 6:00 AM – 7:15 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A site arrival check was carried out at the remote camp, covering the accommodation demountable condition, the safety induction checklist, and equipment maintenance bay status. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

The accommodation block was confirmed in good condition with no maintenance issues, the site safety induction checklist was completed and signed off before start, and the equipment maintenance bay was checked with all machinery accounted for and parked correctly.

Arrival Summary

Category	Observation	Status	Action Required
Accommodation	Demountable in good condition, no issues	On Track	None
Safety Induction	Checklist completed and signed off	Complete	None
Equipment Bay	All machinery accounted for and parked correctly	On Track	None

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the site arrival, turned into a supervisor-ready report the same day it was captured.
