

Wildlife Survey Report

Client: Demo data - privacy protected · Reserve monitoring visit
Visit Date: 28 September 2026, 6:30 AM – 8:00 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A wildlife survey was carried out at the reserve, covering a watering hole track survey, a camera trap check, and a boundary fence condition walk. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Fresh native wildlife tracks were recorded at the watering hole consistent with regular visitation, the camera trap battery and memory card were checked and confirmed operational, and the boundary fence was found in good condition along the surveyed section.

Survey Summary

Category	Observation	Status	Action Required
Watering Hole	Fresh native wildlife tracks recorded	On Track	None
Camera Trap	Battery and memory card checked, operational	Complete	Retrieve footage next visit
Boundary Fence	Good condition along surveyed section	On Track	None

Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Watering hole — track survey

-25.2341, 151.8765 · 28 Sep 2026, 6:40 AM

Fresh native wildlife tracks recorded in the mud at the watering hole edge.

Camera trap — equipment check

-25.2344, 151.8769 · 28 Sep 2026, 7:12 AM

Motion-sensor camera trap checked, battery and memory card confirmed operational.

Boundary fence — condition walk

-25.2348, 151.8773 · 28 Sep 2026, 7:45 AM

Reserve boundary fence surveyed, good condition along this section with no breaches found.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
6:40 AM	Voice	"Got fresh tracks at the watering hole this morning, looks like regular visitation, good sign."
7:12 AM	Voice	"Camera trap's all good, battery and card checked, ready to keep recording until next visit."
7:45 AM	Text	Boundary fence surveyed along this section, good condition, no breaches found.

Site Visit Log

6:30 AM	Activity started on-site — GPS lock confirmed, reserve location
6:40 AM	Watering hole survey — photo + voice observation logged
7:12 AM	Camera trap check — photo + voice observation logged
7:45 AM	Boundary fence walk — photo + text observation logged
8:00 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the survey, turned into a ranger-ready report the same day it was captured.

Preserver

Free to capture. Record your observations — photo, video, voice or text — with GPS and timestamp on every entry. Export anywhere, including straight to AI. preserver.me
