

Preserver for Journalists

Source interviews and verifiable timestamped evidence for investigations.

Why **Journalists** Need Preserver

Journalists need verifiable evidence that their documentation was captured at a specific time and place. Preserver embeds... Time, date and GPS on every capture — no signal needed.

The Problem

Most documentation depends on connectivity. No signal? No record. No timestamp? No credibility. Journalists professionals need proof — not promises.

How Preserver Helps

- ✓ Source interview notes with timestamps
 - ✓ Scene documentation with GPS coordinates
 - ✓ Timestamped photographic evidence
 - ✓ Works offline in remote or dangerous locations
 - ✓ Verifiable metadata supports editorial integrity
-

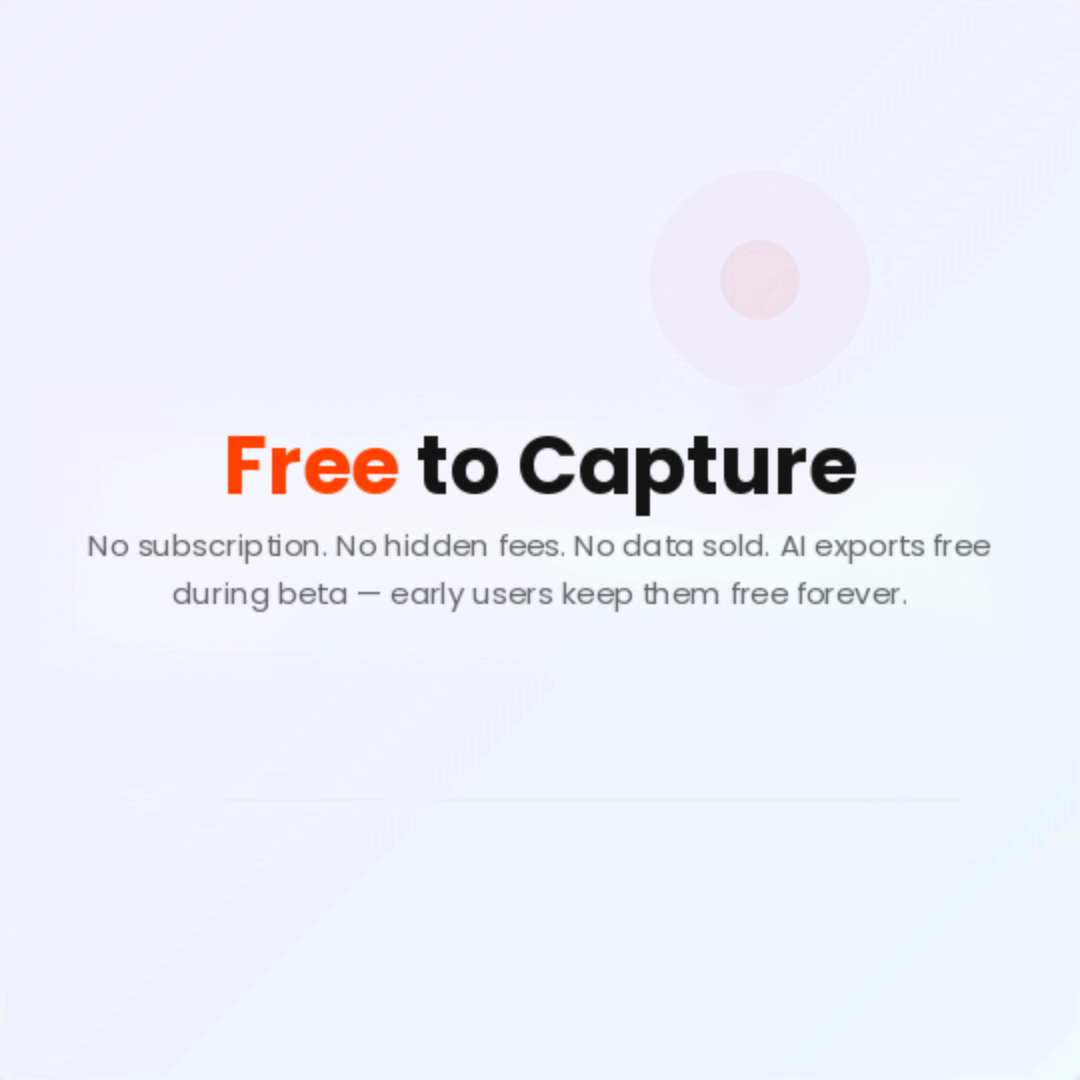

The Insight

Every journalists professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking.

Works Offline

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — underground, remote, or miles from the nearest tower. Sync when you choose.

The background features a light blue gradient with several abstract, overlapping shapes in shades of purple, pink, and yellow. In the upper right quadrant, there is a faint, stylized magnifying glass icon with a pink circular center and a light blue outline.

Free to Capture

No subscription. No hidden fees. No data sold. AI exports free during beta — early users keep them free forever.
