

Garden Visit Report

Client: Demo data - privacy protected · Garden maintenance visit
Visit Date: 28 September 2026, 8:00 AM – 12:30 PM
Generated by: AI report assistant, from a Preserver field export

Summary

A garden maintenance visit was carried out on-site, covering a tools and pruning check, a garden bed and soil check, and a lawn and finish review. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Tools were checked and pruning completed without issue, garden beds were prepared and soil condition checked, and the lawn was mowed with the finish confirmed to a high standard.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the visit, turned into a client-ready update the same afternoon it was captured.
