

Site Security Patrol Report

Client: Demo data - privacy protected · Overnight patrol shift

Visit Date: 28 September 2026, 10:00 PM – 11:15 PM

Generated by: AI report assistant, from a Preserver field export

Summary

An overnight security patrol was carried out at the site, covering a perimeter lock and access point check, a CCTV equipment operational check, and a patrol equipment sign-off. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

All perimeter locks and access points were confirmed secure, CCTV cameras were checked and confirmed operational and recording, and patrol equipment was signed off as fully charged and functional at shift start.

Patrol Summary

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the patrol, turned into a supervisor-ready report the same shift it was captured.
