

Preserver for Scientists

Lab notes and field observations with precise timestamps
and locations.

Why **Scientists** Need Preserver

Scientific field work requires precise timestamps and GPS coordinates for every observation. Preserver captures lab note... Time, date and GPS on every capture — no signal needed.

The Problem

Most documentation depends on connectivity. No signal?
No record. No timestamp? No credibility. Scientists
professionals need proof — not promises.

How Preserver Helps

- ✓ Lab notes and experiment records with timestamps
 - ✓ Field observation records with GPS coordinates
 - ✓ Sample collection location documentation
 - ✓ Works offline in remote field sites
 - ✓ Data capture without connectivity
-

The Insight

Every scientists professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking.

Works Offline

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — underground, remote, or miles from the nearest tower. Sync when you choose.

Free to Capture

No subscription. No hidden fees. No data sold. AI exports free during beta — early users keep them free forever.
