

Preserver for Water Utilities

Infrastructure inspection records, water quality observations
and maintenance logs with GPS verification.

Why Water Utilities Need Preserver

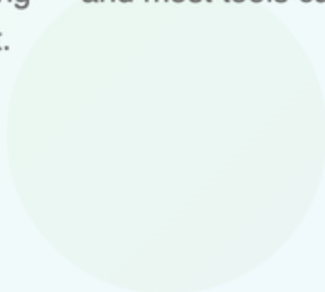

Proof of when and where matters in every industry. Water Utilities professionals need irrefutable records — automatic timestamps and GPS on every capture.

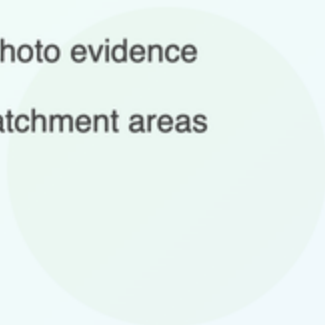

The Problem

Documentation depends on connectivity. No signal means no record. No timestamp means no credibility. For water utilities work in the field, proof is everything — and most tools can't deliver it.

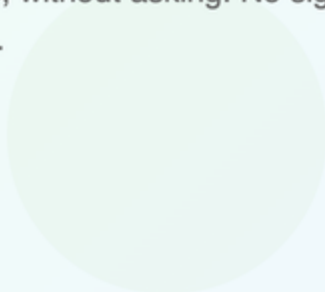

How Preserver Helps

- ✓ GPS-tagged infrastructure inspection records
 - ✓ Water quality observation logs with timestamps
 - ✓ Meter and valve location documentation
 - ✓ Maintenance and repair photo evidence
 - ✓ Works offline in remote catchment areas
- 

The Insight

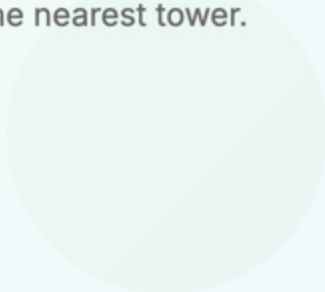

Every water utilities professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking. No signal needed.

Works Offline

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — remote fields, underground, forests, or miles from the nearest tower.

Free to Capture

No subscription. No hidden fees. No data sold. AI exports free during beta — early users keep them free forever.
