

Preserver for Pool Safety Inspectors

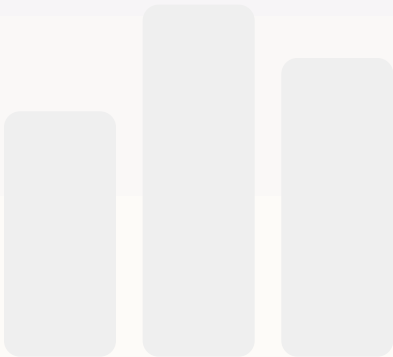

Barrier and compliance photos with timestamps - AI drafts the findings.

Why **Pool Safety Inspectors** Need Preserver

Pool safety certification is standards-based and photo-heavy. Capture every barrier, gate and non-compliance with GPS and timestamps, then export the AI-ready bundle and have AI draft the inspection findings for you.

The Problem

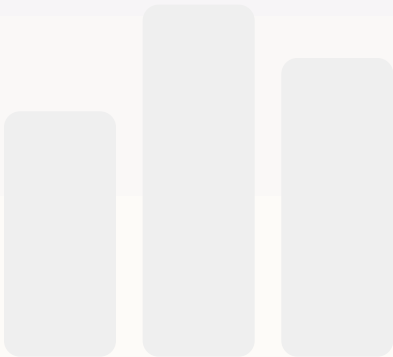

Every barrier, gate and latch has to be checked against the standard and evidenced. Failed items need proof, re-inspections need comparisons - and the paperwork takes hours.

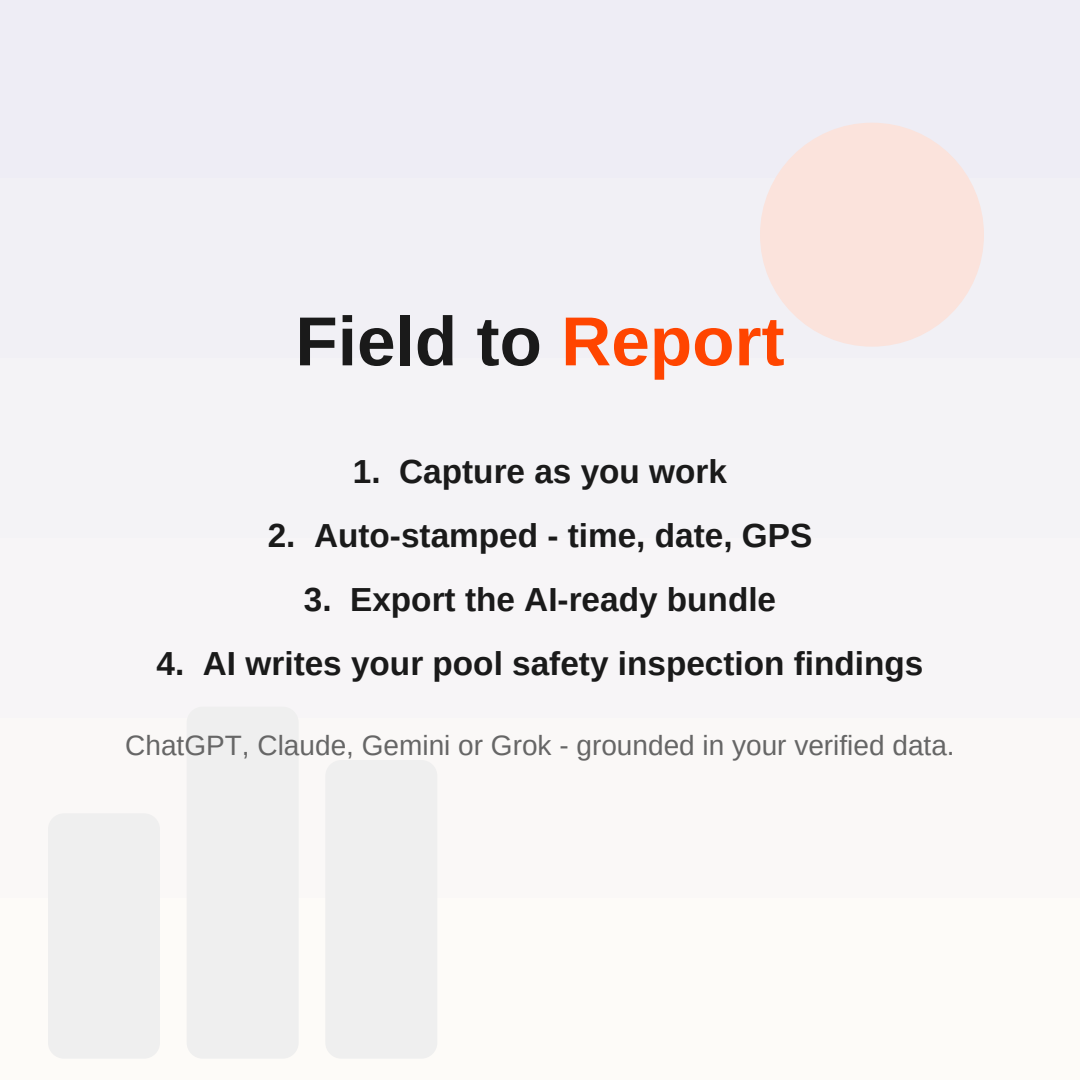

The Solution

Every photo, video, voice note and text is automatically stamped with time, date and GPS at the moment of capture - offline, via satellite. Hash-verified. Nothing editable after the fact.

Field to Report

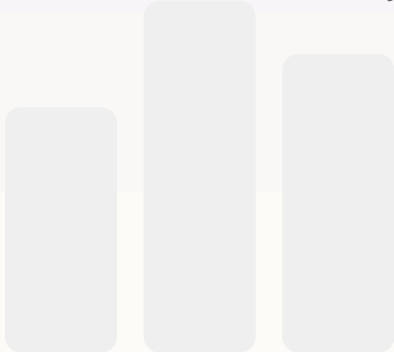

- 1. Capture as you work**
- 2. Auto-stamped - time, date, GPS**
- 3. Export the AI-ready bundle**
- 4. AI writes your pool safety inspection findings**

ChatGPT, Claude, Gemini or Grok - grounded in your verified data.

What You Capture

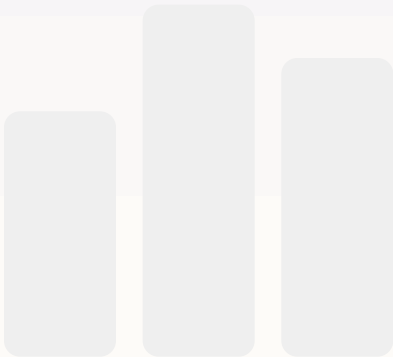

- Timestamped photos of barriers, gates and latches
- Non-compliance documented with location proof
- Re-inspection comparison records
- AI-ready export - findings drafted from your data
- Works offline at any property

AI Exports **Free** in Beta

Early users keep them free forever. Capture is free for everyone, always. We never train AI on your data - you choose which AI sees it.
