

End of Lease Clean Report

Client: Demo data - privacy protected · End-of-lease clean
Visit Date: 28 September 2026, 8:00 AM – 1:30 PM
Generated by: AI report assistant, from a Preserver field export

Summary

An end-of-lease clean was carried out at the rental property, covering the kitchen, bathroom, and a final checklist walkthrough before handover. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

The kitchen was cleaned to a bond-ready standard including all surfaces and appliances, the bathroom shower recess required extra attention to grout staining which was fully resolved, and the final checklist walkthrough confirmed every room ready for inspection.

Clean Summary

Category	Observation	Status	Action Required

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the clean, turned into a client-ready report the same day it was captured.
