

Dietitian Consultation Report

Client: Demo data - privacy protected · Outpatient clinic consultation

Visit Date: 28 September 2026, 10:15 AM – 10:50 AM

Generated by: AI report assistant, from a Preserver field export

Summary

A scheduled dietitian consultation was carried out at the outpatient clinic, covering a food diary review, a pantry and meal-planning discussion, and setting goals for the next check-in. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

The client attended on time with a completed food diary, meal variety was discussed against the agreed plan, and one follow-up item was identified around grocery list updates. Nothing raised was urgent, but the item has been flagged for the next scheduled review.

Visit Summary

Category	Observation	Status	Action Required
Attendance	Client checked in on time with completed food diary	On Track	None
Meal Plan Review	Weekly meal variety broadly matches agreed plan	On Track	Continue current plan
Grocery Planning	Updated grocery list not yet shared with client	Attention	Send updated list this week

Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Consultation room — nutrition chart on display

-27.4705, 153.0260 · 28 Sep 2026, 10:16 AM

Nutrition reference chart used during the session, logged against the appointment start time.

Clipboard — food diary review checklist

-27.4706, 153.0261 · 28 Sep 2026, 10:25 AM

Food diary checklist showing meal variety compared against the agreed plan for the week.

Consultation desk — goal-setting worksheet

-27.4704, 153.0259 · 28 Sep 2026, 10:45 AM

Goal-setting worksheet used to record the next check-in targets discussed with the client.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
10:16 AM	Voice	"Client's arrived on time and brought the completed food diary, looks like a solid week overall."
10:25 AM	Voice	"Meal variety is tracking well against the plan, breakfast options could use a bit more rotation."
10:45 AM	Text	Updated grocery list wasn't sent ahead of this session — flag to email the revised list before the next visit.

Site Visit Log

10:15 AM	Activity started on-site — GPS lock confirmed, outpatient clinic
10:16 AM	Session setup — photo + text observation logged
10:25 AM	Food diary review — photo + voice observation logged
10:45 AM	Goal-setting — photo + text observation logged
10:50 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the consultation, turned into a clinic-ready dietitian report the same day it was captured.

Preserver

Free to capture. Record your observations — photo, video, voice or text — with GPS and timestamp on every entry. Export anywhere, including straight to AI. preserver.me
