

Preserver for Business Analysts

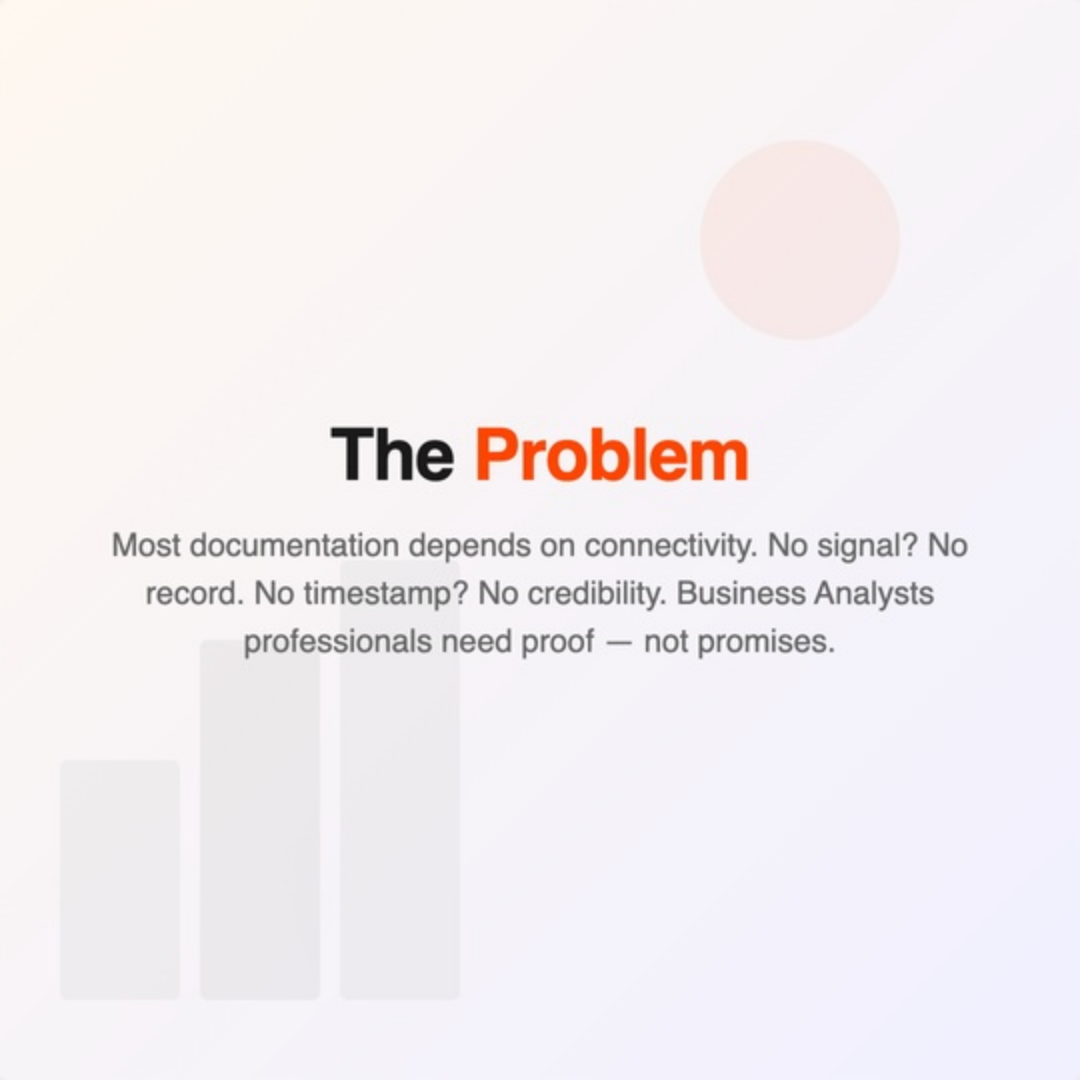

Stakeholder interview notes and process observations in
the field.

Why **Business Analysts** Need Preserver

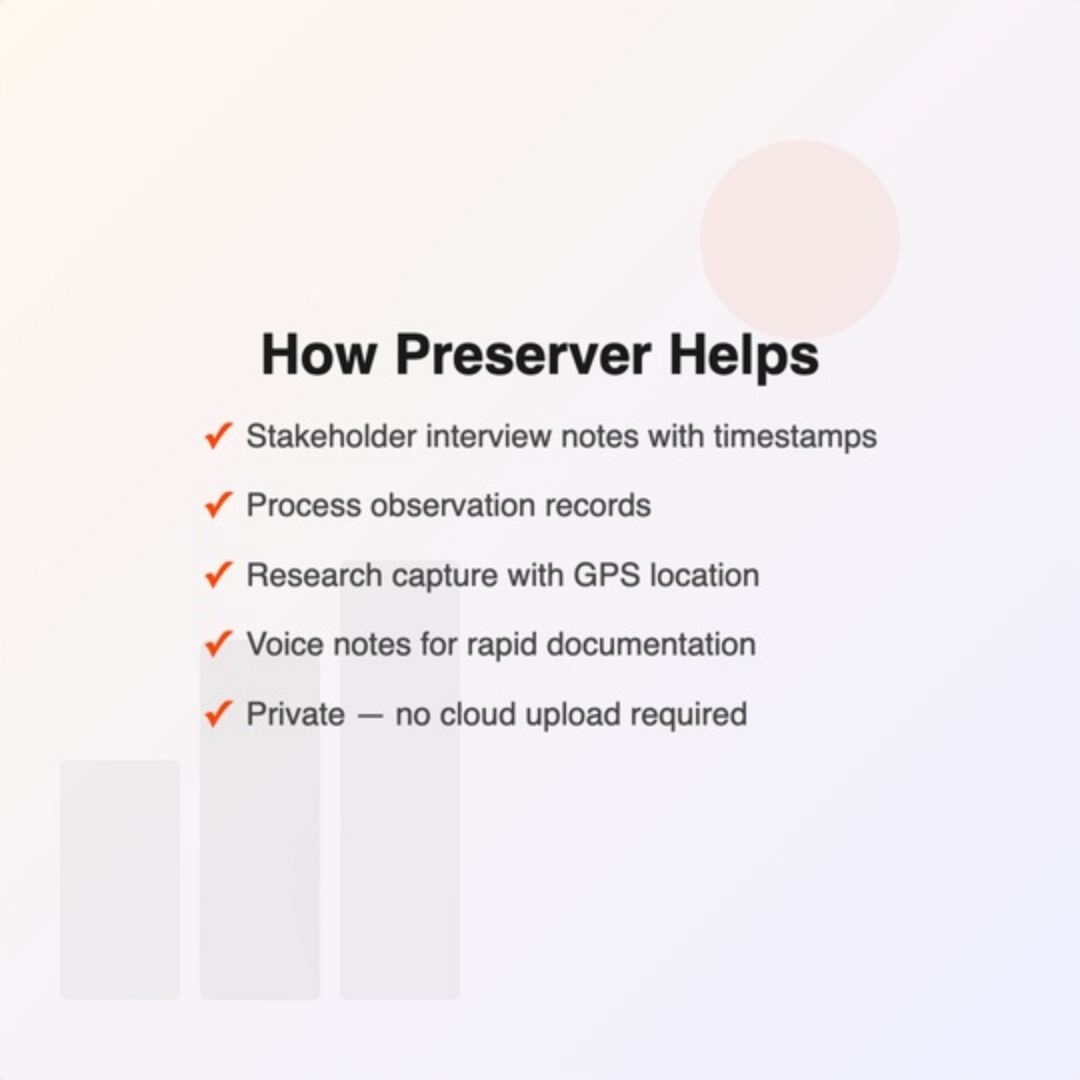

Stakeholder interviews and field observations benefit from accurate, timestamped records. Preserver provides voice-to-text... Time, date and GPS on every capture — no signal needed.

The Problem

Most documentation depends on connectivity. No signal? No record. No timestamp? No credibility. Business Analysts professionals need proof — not promises.

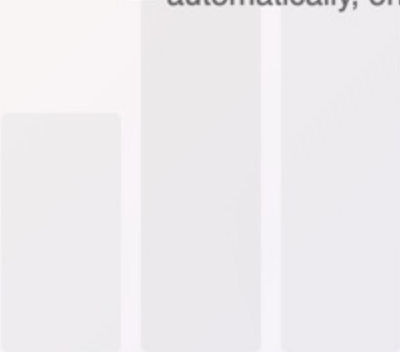

How Preserver Helps

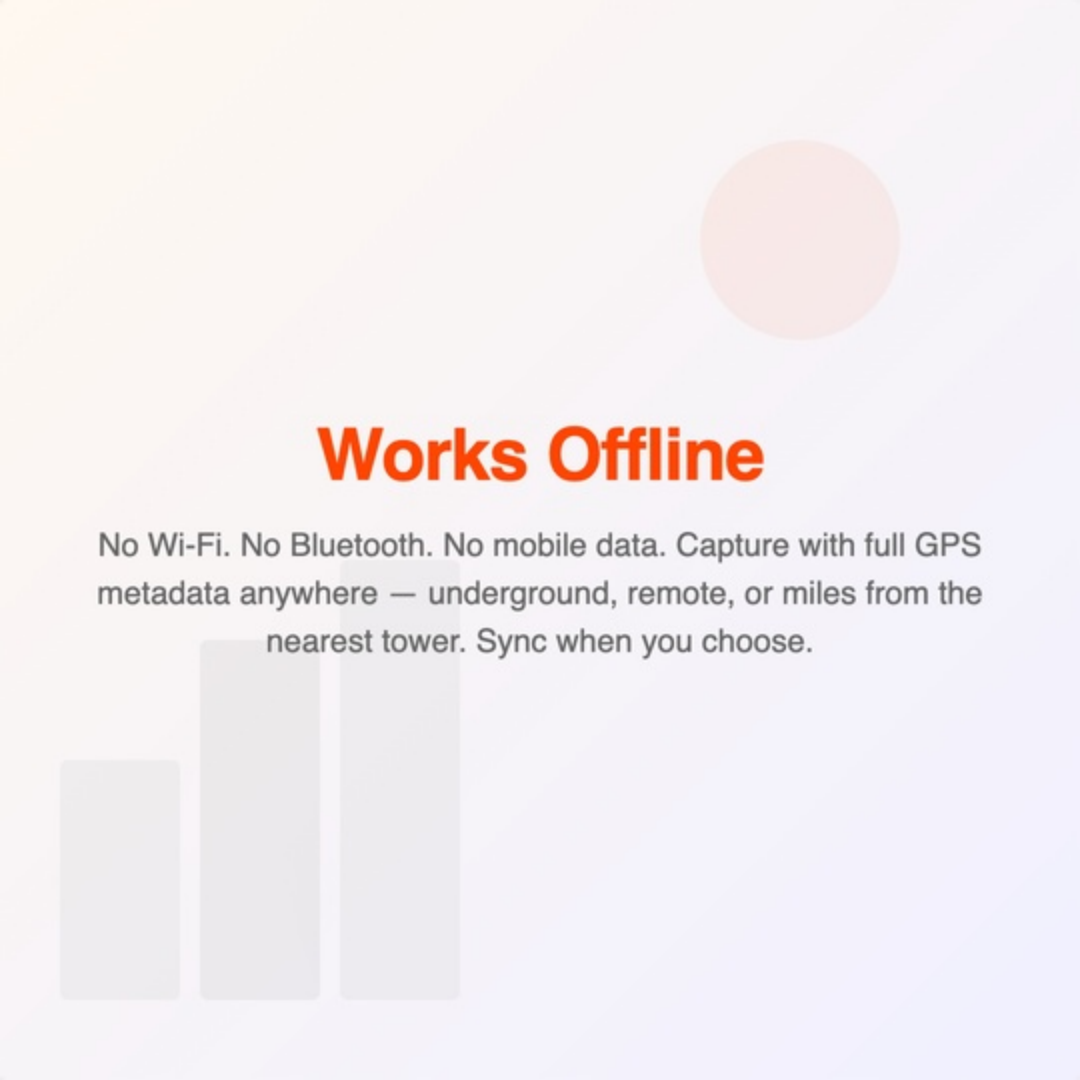

- ✓ Stakeholder interview notes with timestamps
- ✓ Process observation records
- ✓ Research capture with GPS location
- ✓ Voice notes for rapid documentation
- ✓ Private — no cloud upload required

The Insight

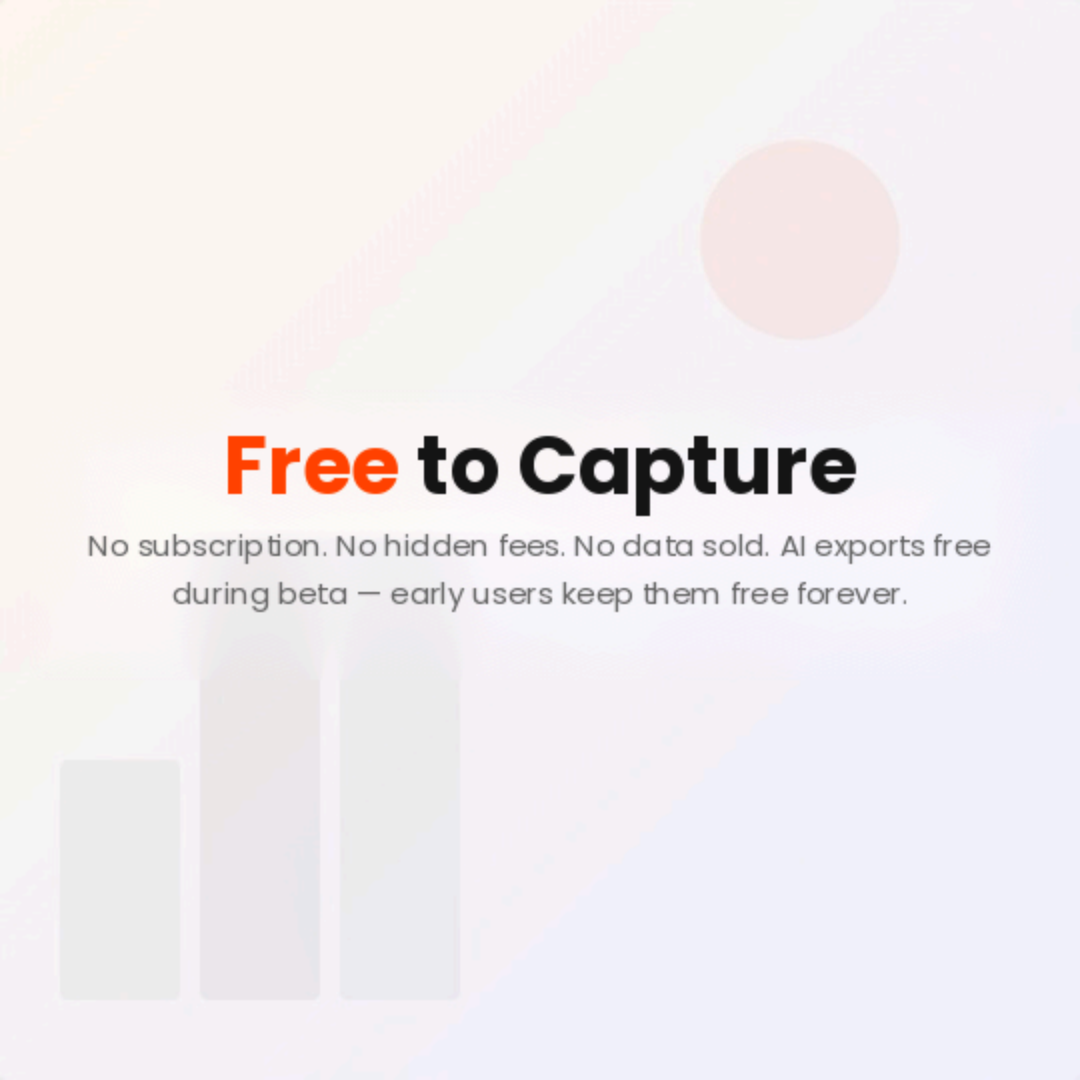

Every business analysts professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking.

The background features a large, semi-transparent orange circle in the upper right quadrant. In the lower left, there are three vertical grey bars of increasing height from left to right. The text is centered in the middle of the slide.

Works Offline

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — underground, remote, or miles from the nearest tower. Sync when you choose.

Free to Capture

No subscription. No hidden fees. No data sold. AI exports free during beta — early users keep them free forever.
