

Preserver for Bond Cleaners

Before/after evidence for bond disputes - AI writes the condition report.

Why **Bond Cleaners** Need Preserver

Bond disputes come down to evidence. Timestamped before/after photos with GPS prove the property's condition at handover - and one AI-ready export turns the whole clean into a client-ready condition report.

The Problem

He said, she said at bond time. Photos buried in a camera roll with no proof of when they were taken. Agents and tenants dispute what the property looked like at handover.

The Solution

Every photo, video, voice note and text is automatically stamped with time, date and GPS at the moment of capture - offline, via satellite. Hash-verified. Nothing editable after the fact.

Field to Report

- 1. Capture as you work**
- 2. Auto-stamped - time, date, GPS**
- 3. Export the AI-ready bundle**
- 4. AI writes your bond condition report**

ChatGPT, Claude, Gemini or Grok - grounded in your verified data.

What You **Capture**

- Before/after photos of every room, GPS-stamped
- Proof of exactly when the clean happened
- Client sign-off and completion records
- AI-ready export - condition report drafted for you
- Works offline in any property

AI Exports **Free** in Beta

Early users keep them free forever. Capture is free for everyone, always. We never train AI on your data - you choose which AI sees it.
