

Childcare Shift Report

Client: Demo data - privacy protected · Evening babysitting shift
Visit Date: 28 September 2026, 4:30 PM – 8:00 PM
Generated by: AI report assistant, from a Preserver field export

Summary

An evening babysitting shift was carried out on-site, covering an activity and playtime check, a mealtime and snack check, and a bedtime routine and settle check. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

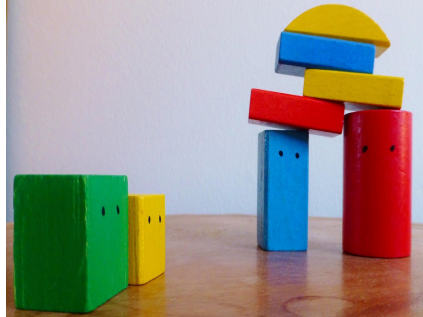

Activities and playtime went smoothly with no incidents, the evening meal and snack were served on schedule, and the bedtime routine was completed with the child settled and asleep before the shift ended.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the shift, turned into a parent-ready update the same evening it was captured.
