

Field Interview Report

Client: Demo data - privacy protected · On-location interview and fact-check
Visit Date: 28 September 2026, 1:00 PM – 2:10 PM
Generated by: AI report assistant, from a Preserver field export

Summary

A field interview and fact-check was carried out on location, covering interview note preparation, an on-site recording and quote capture, and a draft copy review. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Interview notes were prepared and cross-checked against background research, the on-site recording captured clean audio with all key quotes logged, and the draft copy was reviewed and confirmed ready for editorial sign-off.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the assignment, turned into an editor-ready file the same day it was captured.
