

Market Study Report

Client: Demo data - privacy protected - Market research study

Visit Date: 28 September 2026, 10:00 AM – 11:15 AM

Generated by: AI report assistant, from a Preserver field export

Summary

A market research study was carried out, covering a survey design and fieldwork check, a data analysis and trend review, and a focus group session review. All observations were captured using the Preserver app, with timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

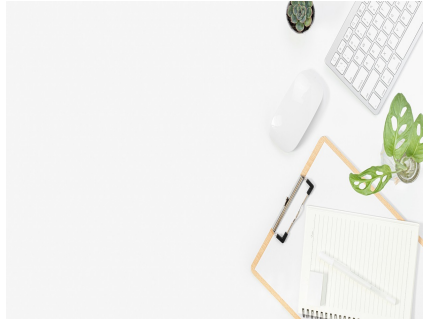

The survey and fieldwork materials were checked and confirmed ready, the collected data was analysed and trends confirmed consistent with the brief, and the focus group session was reviewed and signed off ready for reporting.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped record of the study, turned into a reporting-ready file the same morning it was captured.
