

Classroom Readiness Report

Client: Demo data - privacy protected · Term start classroom readiness check

Visit Date: 28 September 2026, 7:45 AM – 8:35 AM

Generated by: AI report assistant, from a Preserver field export

Summary

A classroom readiness check was carried out on-site, covering a lesson materials and resources check, a whiteboard and equipment check, and a classroom set-up walkthrough. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Lesson materials and resources were checked and confirmed ready for the day, whiteboard and classroom equipment were tested and confirmed working, and the classroom set-up was reviewed and signed off ready for students.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the check, turned into a school-ready report the same morning it was captured.
