

Preserver for Mould Assessors

Room-by-room findings and moisture notes - AI drafts the assessment report.

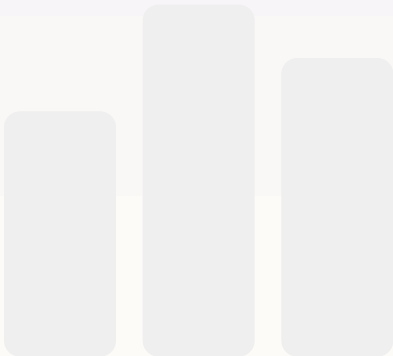

Why **Mould Assessors** Need Preserver

Mould assessments are photo-heavy and moisture-data-heavy.

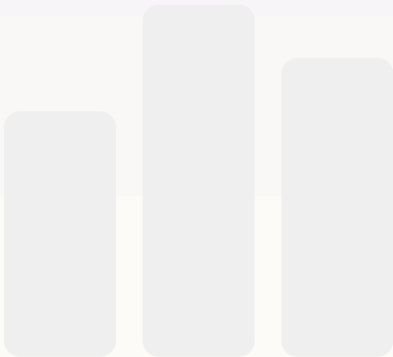

Capture every affected area with GPS and timestamps, log readings by voice, then export the AI-ready bundle and let AI draft the assessment report from verified findings.

The Problem

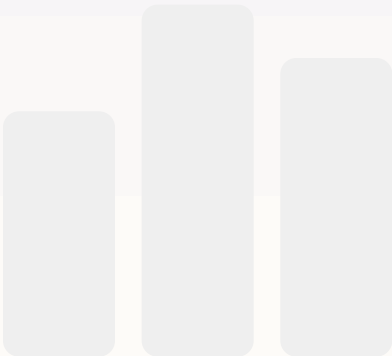

Room after room of photos and moisture readings - then a night of assembling them into a report the client will actually act on.

The Solution

Every photo, video, voice note and text is automatically stamped with time, date and GPS at the moment of capture - offline, via satellite. Hash-verified. Nothing editable after the fact.

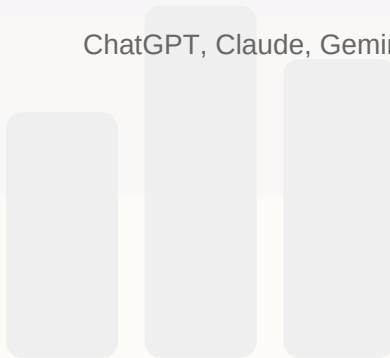

Field to Report

- 1. Capture as you work**
- 2. Auto-stamped - time, date, GPS**
- 3. Export the AI-ready bundle**
- 4. AI writes your mould assessment report**

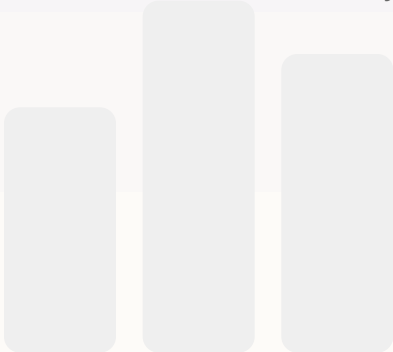

ChatGPT, Claude, Gemini or Grok - grounded in your verified data.

What You Capture

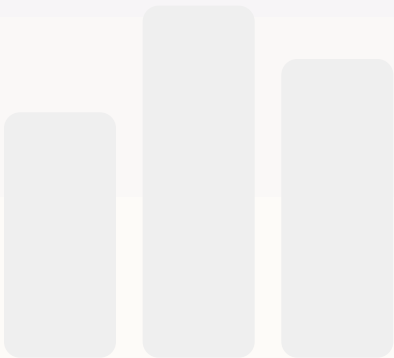

- Timestamped photos of every affected area
- Moisture readings logged by voice as you go
- GPS-tagged room-by-room findings
- AI-ready export - report drafted from your data
- Works offline in any property

AI Exports **Free** in Beta

Early users keep them free forever. Capture is free for everyone, always. We never train AI on your data - you choose which AI sees it.
