

Preserver for **Agriculture**

Crop records, paddock observations and GPS-tagged farming data — works completely offline across large properties.

Why **Agriculture** Need Preserver

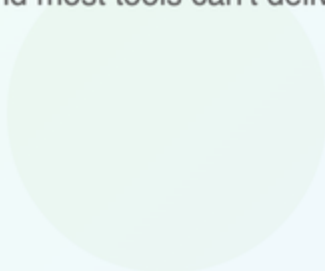

Proof of when and where matters in every industry. Agriculture professionals need irrefutable records — automatic timestamps and GPS on every capture.

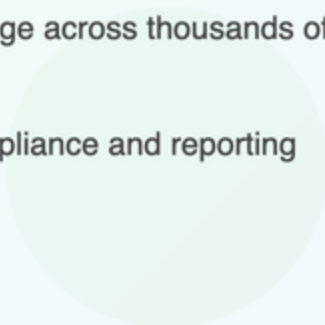

The Problem

Documentation depends on connectivity. No signal means no record. No timestamp means no credibility. For agriculture work in the field, proof is everything — and most tools can't deliver it.

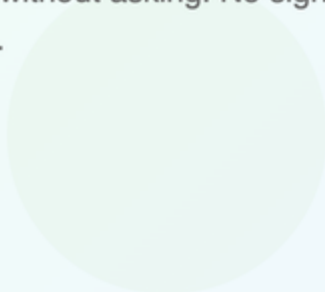

How Preserver Helps

- ✓ Crop health photos with GPS coordinates
 - ✓ Paddock observation logs with automatic timestamps
 - ✓ Fencing and infrastructure inspection records
 - ✓ Works without mobile coverage across thousands of hectares
 - ✓ GPS-tagged records for compliance and reporting
- 

The **Insight**

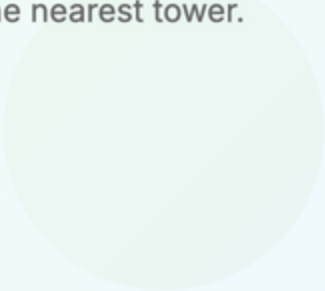

Every agriculture professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking. No signal needed.

Works Offline

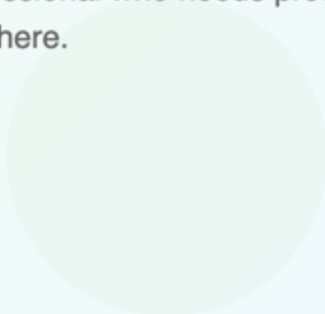

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — remote fields, underground, forests, or miles from the nearest tower.

\$49 Once

No subscription. No hidden fees. No data sold. One purchase, forever. For every agriculture professional who needs proof of when and where.

Get Preserver

For Agriculture
