

Preserver for **Agronomists**

Crop assessment records, soil observation logs and GPS-tagged field trial documentation for precision agriculture.

Why **Agronomists** Need Preserver

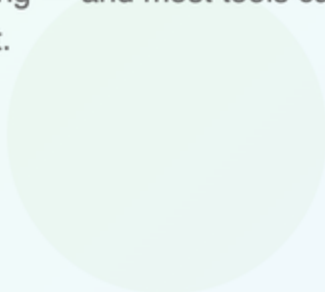

Proof of when and where matters in every industry.
Agronomists professionals need irrefutable records —
automatic timestamps and GPS on every capture.

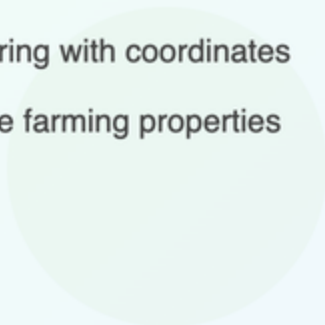

The Problem

Documentation depends on connectivity. No signal means no record. No timestamp means no credibility. For agronomists work in the field, proof is everything — and most tools can't deliver it.

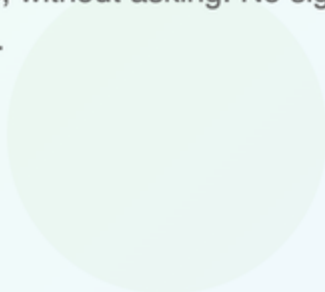

How Preserver Helps

- ✓ GPS-tagged crop assessment records
 - ✓ Soil observation logs with timestamps
 - ✓ Field trial and variety documentation
 - ✓ Pest and disease monitoring with coordinates
 - ✓ Works offline across large farming properties
- 

The Insight

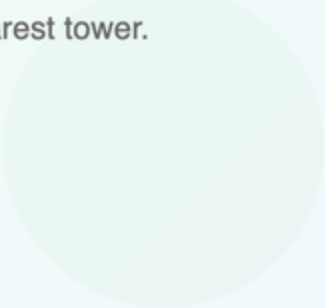

Every agronomists professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking. No signal needed.

Works Offline

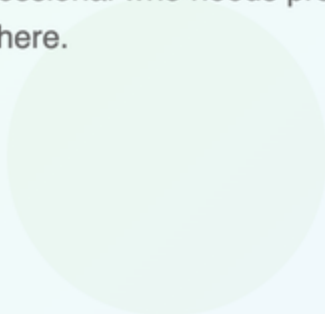

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — remote fields, underground, forests, or miles from the nearest tower.

\$49 Once

No subscription. No hidden fees. No data sold. One purchase, forever. For every agronomists professional who needs proof of when and where.
