

Preserver for Chiropractors

Session notes, treatment observations and patient progress records.

Why Chiropractors Need Preserver

Clinical session notes need to be accurate, private and easily retrievable. Preserver provides a private voice and text ... Time, date and GPS on every capture — no signal needed.

The Problem

Most documentation depends on connectivity. No signal? No record. No timestamp? No credibility. Chiropractors professionals need proof — not promises.

How Preserver Helps

- ✓ Session notes and treatment observations
- ✓ Patient progress records over multiple visits
- ✓ Voice notes during consultations
- ✓ Referral and correspondence records
- ✓ Private — data stays on device

The Insight

Every chiropractors professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking.

Works Offline

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — underground, remote, or miles from the nearest tower. Sync when you choose.

\$49 Once

No subscription. No hidden fees. No data sold. One purchase, forever. For all chiropractors professionals who need proof of when and where.
