

Preserver for Developers

Bug documentation, field testing notes and client site observations.

Why **Developers** Need Preserver

Bug documentation and field testing benefit from precise timestamps and GPS location. Preserver provides a quick capture... Time, date and GPS on every capture — no signal needed.

The Problem

Most documentation depends on connectivity. No signal?
No record. No timestamp? No credibility. Developers
professionals need proof — not promises.

How Preserver Helps

- ✓ Bug documentation with timestamps and GPS
 - ✓ Field testing notes and observations
 - ✓ Client site visit records
 - ✓ Device and OS condition documentation
 - ✓ Works offline in testing environments
-

The Insight

Every developers professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking.

Works Offline

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — underground, remote, or miles from the nearest tower. Sync when you choose.

\$49 Once

No subscription. No hidden fees. No data sold. One purchase, forever. For all developers professionals who need proof of when and where.
