

Preserver for Forestry

Forest management records, harvest documentation and
GPS-tagged observation logs for remote timber operations.

Why **Forestry** Need Preserver

Proof of when and where matters in every industry. Forestry professionals need irrefutable records — automatic timestamps and GPS on every capture.

The Problem

Documentation depends on connectivity. No signal means no record. No timestamp means no credibility. For forestry work in the field, proof is everything — and most tools can't deliver it.

How Preserver Helps

- ✓ GPS-tagged forest stand records and observations
 - ✓ Harvest documentation with timestamps
 - ✓ Safety inspection logs for remote operations
 - ✓ Boundary and compliance marker photos
 - ✓ Works without mobile coverage in deep forest
- 

The Insight

Every forestry professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking. No signal needed.

Works Offline

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — remote fields, underground, forests, or miles from the nearest tower.

\$49 Once

No subscription. No hidden fees. No data sold. One purchase, forever. For every forestry professional who needs proof of when and where.
