

Preserver for Geologists

GPS-tagged field observations, core sample records and geological survey documentation — works offline on remote sites.

Why **Geologists** Need Preserver

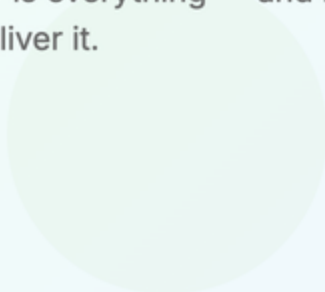

Proof of when and where matters in every industry. Geologists professionals need irrefutable records — automatic timestamps and GPS on every capture.

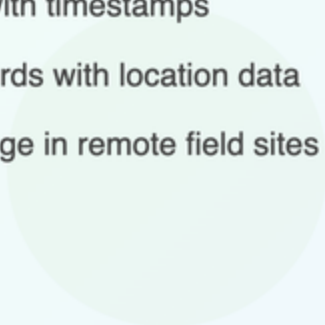

The Problem

Documentation depends on connectivity. No signal means no record. No timestamp means no credibility. For geologists work in the field, proof is everything — and most tools can't deliver it.

How Preserver Helps

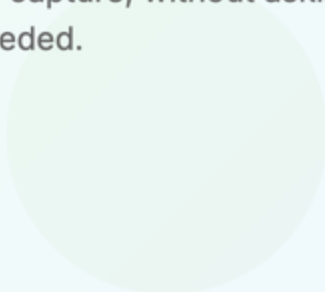

- ✓ GPS-tagged field observation records
 - ✓ Core sample location documentation with coordinates
 - ✓ Survey and mapping notes with timestamps
 - ✓ Rock and mineral photo records with location data
 - ✓ Works without mobile coverage in remote field sites
- 

The Insight

Every geologists professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking.

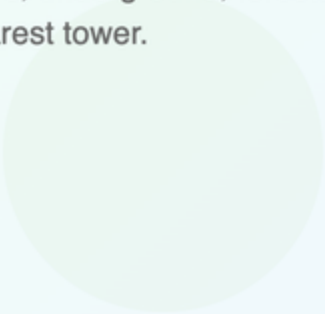

No signal needed.

Works Offline

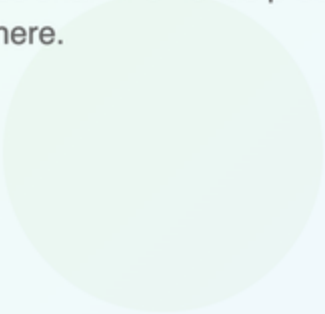

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — remote fields, underground, forests, or miles from the nearest tower.

\$49 Once

No subscription. No hidden fees. No data sold. One purchase, forever. For every geologists professional who needs proof of when and where.
