

Preserver for Mining

Safety inspection records, incident documentation and GPS-tagged site observations — works underground without signal.

Why **Mining** Need Preserver

Proof of when and where matters in every industry. Mining professionals need irrefutable records — automatic timestamps and GPS on every capture.

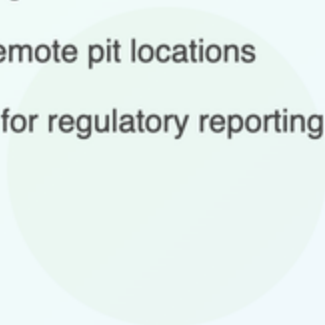

The Problem

Documentation depends on connectivity. No signal means no record. No timestamp means no credibility. For mining work in the field, proof is everything — and most tools can't deliver it.

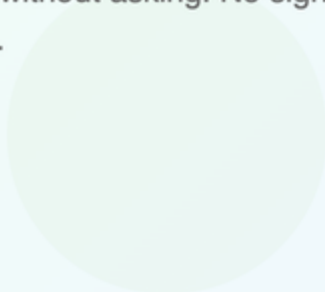

How Preserver Helps

- ✓ GPS-tagged safety inspection records
 - ✓ Incident documentation with timestamps and location
 - ✓ Equipment condition photo logs
 - ✓ Works underground and in remote pit locations
 - ✓ Compliance-ready audit trail for regulatory reporting
- 

The **Insight**

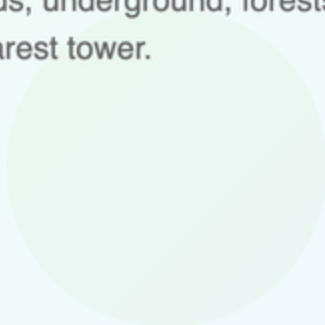

Every mining professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking. No signal needed.

Works Offline

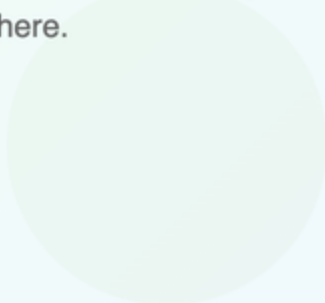

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — remote fields, underground, forests, or miles from the nearest tower.

\$49 Once

No subscription. No hidden fees. No data sold. One purchase, forever. For every mining professional who needs proof of when and where.
