

Aged Care Visit Report

Client: Demo data - privacy protected · In-home wellbeing check
Visit Date: 28 September 2026, 10:05 AM – 10:24 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A routine in-home wellbeing check was carried out for the resident, covering a vital signs reading, a medication adherence review, and a mobility and home-safety walkthrough. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Overall, the resident's vital signs were within a normal range, one weekly medication compartment appeared to have been missed, and a minor trip hazard was identified near the hallway walking frame. None of the findings were urgent, but each has been flagged for follow-up with the family and care coordinator.

Visit Summary

Category	Observation	Status	Action Required
Vital Signs	Blood pressure 132/82 — within normal range	Normal	Continue routine monitoring
Medication Adherence	Weekly organizer — Thursday slot not taken	Attention	Reminder call scheduled
Mobility & Home Safety	Loose rug near walking frame in hallway	Attention	Recommend rug removal

Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Vital signs — blood pressure monitor reading

-27.4689, 153.0234 · 28 Sep 2026, 10:08 AM

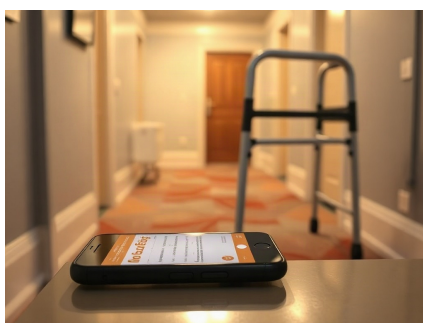

Cuff reading of 132/82, within the resident's normal range, logged against the visit timestamp.

Medication organizer — weekly pill box

-27.4690, 153.0235 · 28 Sep 2026, 10:14 AM

Thursday compartment still full, indicating a missed dose. Remaining days match the prescribed schedule.

Home-safety checklist — hallway walkthrough

-27.4688, 153.0233 · 28 Sep 2026, 10:20 AM

On-device checklist flagging a loose hallway rug positioned near the resident's walking frame.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
10:08 AM	Voice	"Blood pressure's looking good today, one-thirty-two over eighty-two. Resident says they slept well, nothing new to report."
10:14 AM	Voice	"Thursday's tablets weren't taken, box is still full for that day. I'll flag this for a reminder call to the family."
10:20 AM	Text	Hallway rug near the walking frame is a trip hazard. Recommend removing it before the next visit.

Site Visit Log

10:05 AM	Activity started on-site — GPS lock confirmed, resident's home
10:08 AM	Vital signs — photo + voice observation logged
10:14 AM	Medication check — photo + voice observation logged
10:20 AM	Home-safety checklist — photo + text observation logged
10:24 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the visit, turned into a family- and coordinator-ready wellbeing report the same day it was captured.
