

Preserver for Process Servers

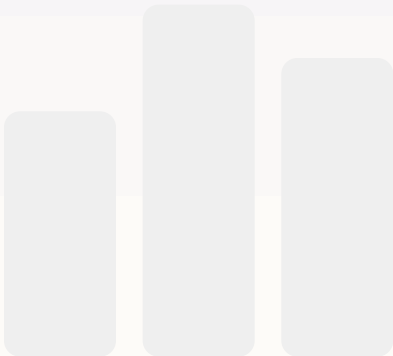

GPS-timestamped proof of every serve attempt -
affidavit-ready.

Why **Process Servers** Need Preserver

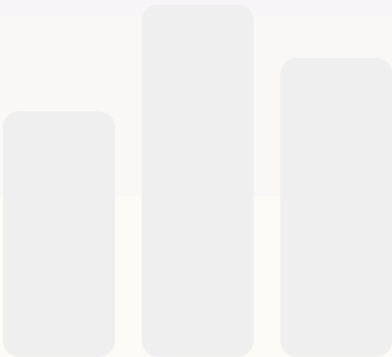

Proof of service is your entire product. Preserver stamps every attempt with GPS, time and date - photos, voice notes and observations - and exports an AI-ready bundle your affidavit can be drafted from.

The Problem

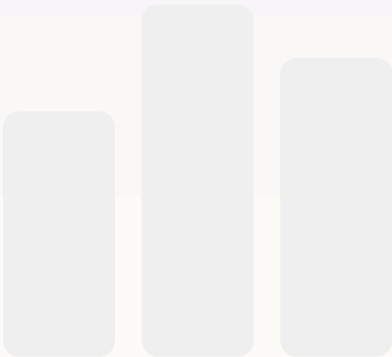

A serve without proof is a serve that gets challenged. Time, address and attempt history have to be beyond dispute - memory and paper notes aren't.

The Solution

Every photo, video, voice note and text is automatically stamped with time, date and GPS at the moment of capture - offline, via satellite. Hash-verified. Nothing editable after the fact.

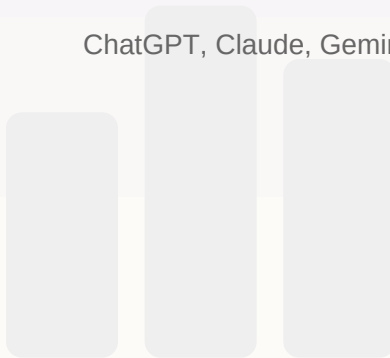

Field to Report

- 1. Capture as you work**
- 2. Auto-stamped - time, date, GPS**
- 3. Export the AI-ready bundle**
- 4. AI writes your affidavit of service**

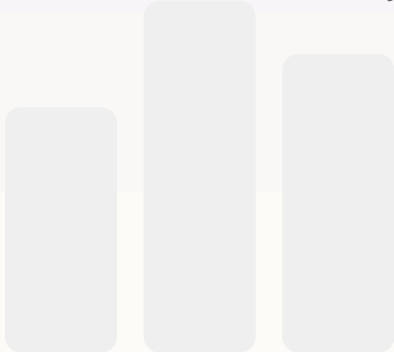

ChatGPT, Claude, Gemini or Grok - grounded in your verified data.

What You Capture

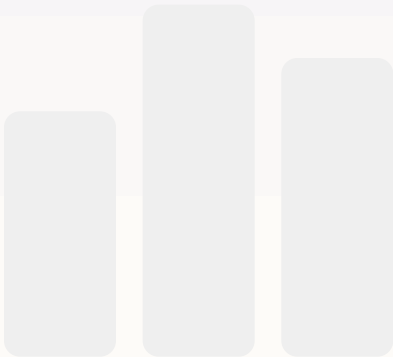

- GPS and timestamped proof of every attempt
- Photo and voice documentation at the address
- Attempt history with verifiable metadata
- AI-ready export supports affidavit drafting
- Works offline at any address

AI Exports **Free** in Beta

Early users keep them free forever. Capture is free for everyone, always. We never train AI on your data - you choose which AI sees it.
