

Training Session Report

Client: Demo data - privacy protected · Personal training session
Visit Date: 28 September 2026, 6:00 AM – 7:00 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A personal training session was carried out, covering an equipment and warm-up check, a workout and heart-rate monitoring check, and a session summary and progress review. All observations were captured using the Preserver app, with timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Equipment was checked and the warm-up completed without issue, the workout was completed with heart rate monitored throughout, and progress was reviewed and confirmed on track against the client's goals.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped record of the session, turned into a progress-ready update the same morning it was captured.
