

Photo Shoot Delivery Report

Client: Demo data - privacy protected · Studio shoot and delivery

Visit Date: 28 September 2026, 2:00 PM – 3:15 PM

Generated by: AI report assistant, from a Preserver field export

Summary

A studio photo shoot and delivery session was carried out on-site, covering a gear and equipment check, a studio lighting set-up check, and a post-production edit and delivery review. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Camera gear was checked and confirmed in working order, the studio lighting set-up was tested and confirmed correct for the brief, and the final edits were reviewed and confirmed ready for client delivery.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the shoot, turned into a client-ready delivery the same day it was captured.
