

Research Data Collection Report

Client: Demo data - privacy protected · Field research data collection

Visit Date: 28 September 2026, 10:00 AM – 11:15 AM

Generated by: AI report assistant, from a Preserver field export

Summary

A field research data collection session was carried out on-site, covering a sample and specimen check, a literature and reference review, and a preliminary data analysis walkthrough. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Samples were checked and logged against the study protocol, reference materials were reviewed and cross-checked against the research question, and preliminary data trends were reviewed and confirmed consistent with the study hypothesis.

Collection Summary

Category	Observation	Status	Action Required
Sample Check	Logged against study protocol, no issues	Complete	None
Reference Review	Cross-checked against research question	Complete	None
Data Analysis	Trends consistent with study hypothesis	Complete	None

Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Sample — microscope check

-27.4697, 153.0249 · 28 Sep 2026, 10:08 AM

Sample examined under the microscope, logged against the study protocol.

Reference materials — literature review

-27.4697, 153.0249 · 28 Sep 2026, 10:35 AM

Reference materials reviewed, cross-checked against the research question.

Data analysis — preliminary review

-27.4697, 153.0249 · 28 Sep 2026, 11:02 AM

Preliminary data trends reviewed, confirmed consistent with the study hypothesis.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
10:08 AM	Voice	"Sample's logged and checked against protocol, nothing out of the ordinary."
10:35 AM	Voice	"Reference materials check out against the research question, good to build on."
11:02 AM	Text	Preliminary data trends reviewed, confirmed consistent with the study hypothesis.

Site Visit Log

10:00 AM	Activity started on-site — GPS lock confirmed, research location
10:08 AM	Sample check — photo + voice observation logged
10:35 AM	Reference review — photo + voice observation logged
11:02 AM	Data analysis walkthrough — photo + text observation logged
11:15 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the session, turned into a publication-ready file the same day it was captured.

Preserver

Free to capture. Record your observations — photo, video, voice or text — with GPS and timestamp on every entry. Export anywhere, including straight to AI. preserver.me
