

Field Sampling Report

Client: Demo data - privacy protected · Field sampling and analysis

Visit Date: 28 September 2026, 9:15 AM – 10:30 AM

Generated by: AI report assistant, from a Preserver field export

Summary

A field sampling and analysis session was carried out on-site, covering a sample collection and labelling check, a microscope examination, and a data log review. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Samples were collected and labelled correctly against the study reference, microscope examination confirmed the expected sample composition, and the data log was reviewed and checked for completeness before submission.

Sampling Summary

Category	Observation	Status	Action Required
Sample Collection	Collected and labelled against reference	Complete	None
Microscope Examination	Composition consistent with expectations	Complete	None
Data Log Review	Checked for completeness before submission	Complete	None

Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Sample glassware — collection check

-27.4691, 153.0227 · 28 Sep 2026, 9:22 AM

Sample glassware checked and labelled correctly against the study reference.

Microscope — sample examination

-27.4691, 153.0227 · 28 Sep 2026, 9:50 AM

Sample examined under the microscope, composition consistent with expectations.

Data log — completeness review

-27.4691, 153.0227 · 28 Sep 2026, 10:18 AM

Data log reviewed at the desk, checked for completeness before submission.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
9:22 AM	Voice	"Samples are collected and labelled correctly, matching up with the reference sheet."
9:50 AM	Voice	"Microscope check looks as expected, composition matches what we predicted."
10:18 AM	Text	Data log reviewed and checked for completeness before submission.

Site Visit Log

9:15 AM	Activity started on-site — GPS lock confirmed, field location
9:22 AM	Sample collection check — photo + voice observation logged
9:50 AM	Microscope examination — photo + voice observation logged
10:18 AM	Data log review — photo + text observation logged
10:30 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the session, turned into a submission-ready file the same day it was captured.

Preserver

Free to capture. Record your observations — photo, video, voice or text — with GPS and timestamp on every entry. Export anywhere, including straight to AI. preserver.me
