

Compliance Audit Report

Client: Demo data - privacy protected · Site compliance audit

Visit Date: 28 September 2026, 9:30 AM – 10:40 AM

Generated by: AI report assistant, from a Preserver field export

Summary

A compliance audit was carried out at the facility, covering a regulatory checklist review, a workplace safety signage and fire equipment check, and a site records and documentation review. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

The regulatory checklist was completed with no outstanding items, safety signage and fire extinguisher stations were confirmed current and accessible, and site records were reviewed and found consistent with the compliance register.

Audit Summary

Category	Observation	Status	Action Required
Regulatory Checklist	Completed, no outstanding items	Complete	None
Safety Signage & Equipment	Signage current, fire equipment accessible	On Track	None
Site Records	Consistent with compliance register	Complete	None

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the audit, turned into a regulator-ready report the same day it was captured.
