

Pest Inspection Report

Client: Demo data - privacy protected · Residential pest inspection
Visit Date: 28 September 2026, 10:30 AM – 11:20 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A pest inspection was carried out at the property, covering the subfloor crawl space, kitchen skirting boards, and exterior bait station placement. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Minor insect activity trails were noted on a subfloor timber beam, a small gap with droppings was found near the kitchen skirting board consistent with occasional rodent activity, and new bait stations were placed around the exterior perimeter as a preventative measure.

Inspection Summary

Category	Observation	Status	Action Required
Subfloor	Insect activity trails on one timber beam	Attention	Monitor, treat if progresses
Kitchen Skirting	Gap with droppings, minor rodent activity	Attention	Seal gap, place bait
Exterior Perimeter	Bait stations placed at 4 points	Complete	Recheck in 4 weeks

Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Subfloor — insect activity trails

-27.4556, 153.0143 · 28 Sep 2026, 10:35 AM

Insect activity trails noted on a subfloor timber beam during the crawl space inspection.

Kitchen skirting — gap and droppings

-27.4556, 153.0143 · 28 Sep 2026, 10:52 AM

Small gap in the kitchen skirting board with droppings, consistent with occasional rodent activity.

Exterior — bait station placement

-27.4555, 153.0142 · 28 Sep 2026, 11:10 AM

New bait station placed along the exterior perimeter as a preventative measure.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
10:35 AM	Voice	"Subfloor's got some trail activity on one of the beams near the back corner, nothing major but worth noting."
10:52 AM	Voice	"There's a gap in the kitchen skirting with a few droppings — looks like occasional activity, not a full infestation."
11:10 AM	Text	Bait stations placed at four points around the exterior perimeter.

Site Visit Log

10:30 AM	Activity started on-site — GPS lock confirmed, property address
10:35 AM	Subfloor inspection — photo + voice observation logged
10:52 AM	Kitchen skirting — photo + voice observation logged
11:10 AM	Bait station placement — photo + text observation logged
11:20 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the inspection, turned into a client-ready report the same day it was captured.
