

# Youth Program Visit Report

Client: Demo data - privacy protected · Community youth centre visit

Visit Date: 28 September 2026, 4:00 PM – 4:40 PM

Generated by: AI report assistant, from a Preserver field export

## Summary

A scheduled youth program session was carried out at the community youth centre, covering group attendance check-in, an activity space safety walkthrough, and end-of-session administrative follow-up. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Attendance matched the sign-up sheet, the activity space passed the safety walkthrough, and one minor equipment item was flagged for maintenance. Nothing raised was urgent, but the item has been flagged for the centre coordinator.

## Visit Summary

| Category              | Observation                                                | Status    | Action Required         |
|-----------------------|------------------------------------------------------------|-----------|-------------------------|
| Attendance            | All registered participants checked in, sheet matches roll | On Track  | None                    |
| Activity Space Safety | Walkthrough complete, no hazards identified                | On Track  | None                    |
| Equipment             | Table tennis net frame loose, minor repair needed          | Attention | Log maintenance request |

## Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

**Activity space — youth centre program room**

-27.4635, 153.0225 · 28 Sep 2026, 4:02 PM

Program room confirmed set up and ready ahead of the session, logged against the visit start time.

**Clipboard — group attendance checklist**

-27.4636, 153.0226 · 28 Sep 2026, 4:04 PM

Attendance checklist showing all registered participants checked in against the sign-up sheet.

**Activity area — equipment safety check**

-27.4634, 153.0224 · 28 Sep 2026, 4:30 PM

Equipment area reviewed during the safety walkthrough, flagging a loose net frame for maintenance.

## Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

| Time    | Type  | Transcript / Note                                                                            |
|---------|-------|----------------------------------------------------------------------------------------------|
| 4:02 PM | Voice | "Room's set up and ready, everyone from the sign-up sheet has arrived and settled in fine."  |
| 4:04 PM | Text  | Attendance checklist matches the roll — no absences or unregistered participants today.      |
| 4:30 PM | Voice | "Table tennis net frame's a bit loose, nothing dangerous but worth logging for maintenance." |

## Site Visit Log

|                |                                                                       |
|----------------|-----------------------------------------------------------------------|
| <b>4:00 PM</b> | Activity started on-site — GPS lock confirmed, community youth centre |
| <b>4:02 PM</b> | Activity space setup — photo + voice observation logged               |
| <b>4:04 PM</b> | Group attendance — photo + text observation logged                    |
| <b>4:30 PM</b> | Equipment safety check — photo + voice observation logged             |
| <b>4:40 PM</b> | Activity ended and locked — record sealed, tamper-evident             |

## How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the visit, turned into a coordinator-ready program report the same day it was captured.
