

Preserver for Tow Truck Drivers

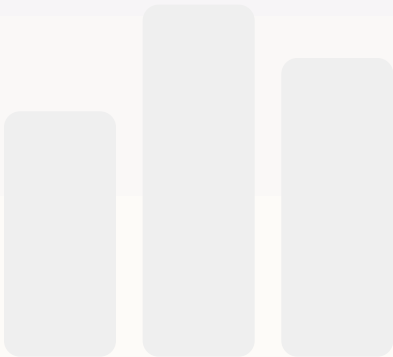

Vehicle condition at pickup and drop-off - GPS-verified,
dispute-proof.

Why **Tow Truck Drivers** Need Preserver

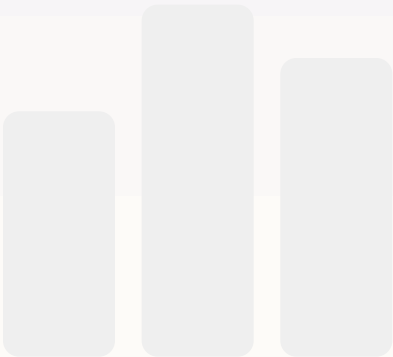

False damage claims follow every tow. Preserver captures vehicle condition at hook-up and drop-off with GPS and timestamps - and exports an AI-ready bundle that becomes a condition report before you leave the yard.

The Problem

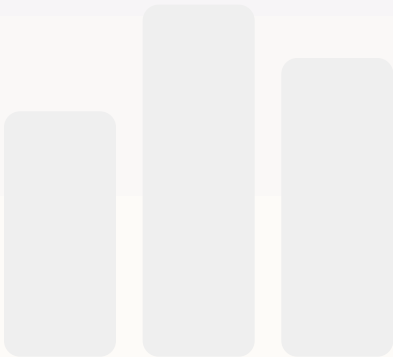

“That scratch was already there” - but can you prove it?
Damage claims land days after the tow, and without
timestamped evidence your word is all you have.

The Solution

Every photo, video, voice note and text is automatically stamped with time, date and GPS at the moment of capture - offline, via satellite. Hash-verified. Nothing editable after the fact.

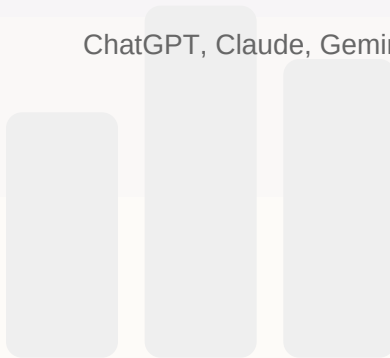

Field to Report

- 1. Capture as you work**
- 2. Auto-stamped - time, date, GPS**
- 3. Export the AI-ready bundle**
- 4. AI writes your vehicle condition report**

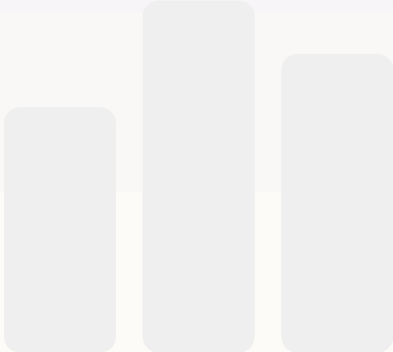

ChatGPT, Claude, Gemini or Grok - grounded in your verified data.

What You Capture

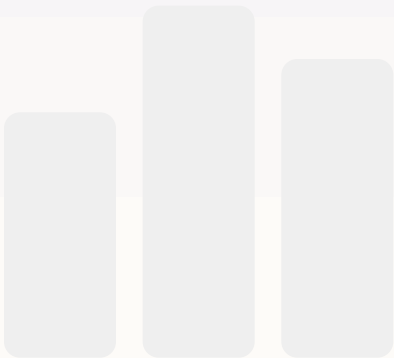

- Condition photos at pickup and drop-off
- GPS-verified tow locations and times
- Pre-existing damage documented on the spot
- AI-ready export for instant condition reports
- Works offline on any roadside

AI Exports **Free** in Beta

Early users keep them free forever. Capture is free for everyone, always. We never train AI on your data - you choose which AI sees it.
