

Preserver for Researchers

Field data collection and GPS-tagged observations —
offline-capable.

Why **Researchers** Need Preserver

Field researchers working in remote areas need GPS-tagged data capture that works without connectivity. Preserver record... Time, date and GPS on every capture — no signal needed.

The Problem

Most documentation depends on connectivity. No signal? No record. No timestamp? No credibility. Researchers professionals need proof — not promises.

How Preserver Helps

- ✓ Field data collection with GPS coordinates
 - ✓ Interview and observation notes with timestamps
 - ✓ GPS-tagged research location records
 - ✓ Works offline in remote research sites
 - ✓ Supports academic and regulatory reporting
-

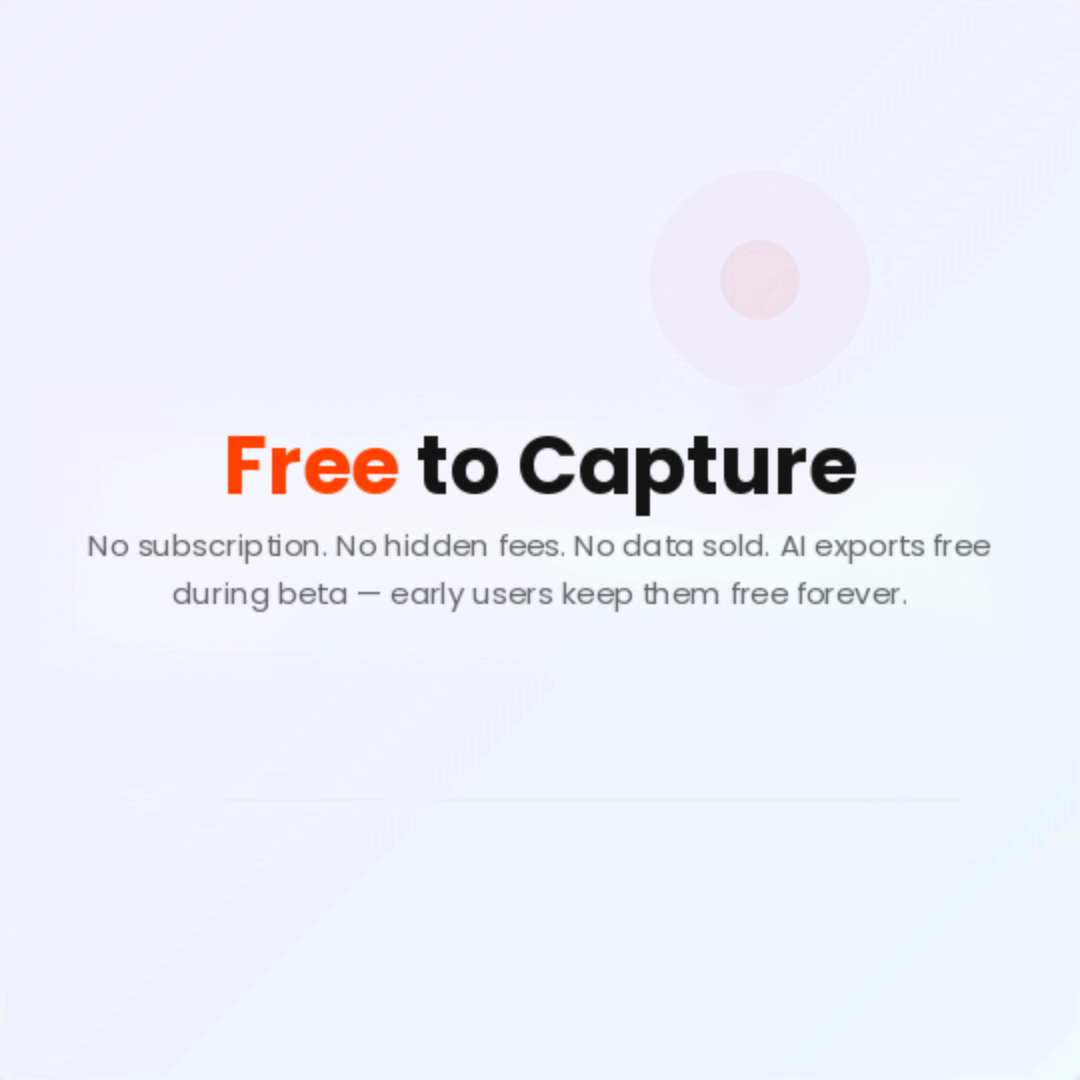

The Insight

Every researchers professional needs three things: a timestamp, a location, and privacy. Preserver delivers all three — automatically, on every capture, without asking.

Works Offline

No Wi-Fi. No Bluetooth. No mobile data. Capture with full GPS metadata anywhere — underground, remote, or miles from the nearest tower. Sync when you choose.

Free to Capture

No subscription. No hidden fees. No data sold. AI exports free during beta — early users keep them free forever.
