

Release Deployment Report

Client: Demo data - privacy protected · Software release deployment

Visit Date: 28 September 2026, 1:00 PM – 2:20 PM

Generated by: AI report assistant, from a Preserver field export

Summary

A release deployment session was carried out, covering a code review and test check, a staging deployment and validation check, and a production release and monitoring review. All observations were captured using the Preserver app, with timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

The code was reviewed and all tests confirmed passing, the staging deployment was validated against the release checklist, and the production release was monitored and confirmed stable after go-live.

Deployment Summary

Category	Observation	Status	Action Required
Code Review	Reviewed, all tests passing	Complete	None
Staging Deployment	Validated against release checklist	Complete	None
Production Release	Monitored, confirmed stable	Complete	None

Field Evidence

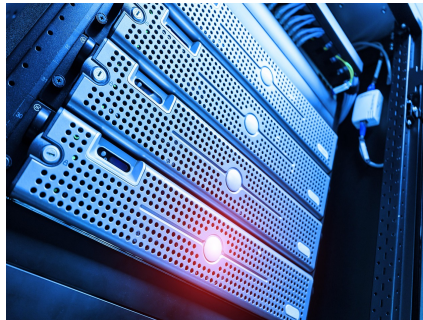

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Code review — test check

-27.4693, 153.0245 · 28 Sep 2026, 1:08 PM

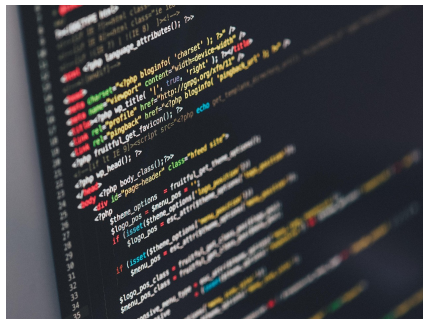

Code reviewed at the desk, all tests confirmed passing before merge.

Server — staging deployment check

-27.4693, 153.0245 · 28 Sep 2026, 1:35 PM

Staging deployment validated against the release checklist.

Production — release monitoring

-27.4693, 153.0245 · 28 Sep 2026, 2:05 PM

Production release monitored, confirmed stable after go-live.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
1:08 PM	Voice	"Code's reviewed, tests are all passing, ready to merge to staging."
1:35 PM	Voice	"Staging deploy's validated against the checklist, looking good for release."
2:05 PM	Text	Production release monitored and confirmed stable after go-live.

Site Visit Log

1:00 PM	Activity started — GPS lock confirmed, workspace location
1:08 PM	Code review and test check — photo + voice observation logged
1:35 PM	Staging deployment check — photo + voice observation logged
2:05 PM	Production release monitoring — photo + text observation logged
2:20 PM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped record of the release process, turned into an audit-ready deployment log the same day it was captured.

Preserver

Free to capture. Record your observations — photo, video, voice or text — with GPS and timestamp on every entry. Export anywhere, including straight to AI. preserver.me
