

# Renovation Progress Report

Client: Demo data - privacy protected · Home renovation work day  
Visit Date: 28 September 2026, 7:30 AM – 4:00 PM  
Generated by: AI report assistant, from a Preserver field export

## Summary

A home renovation work day was carried out on-site, covering a tools and materials check, a demolition and prep check, and a progress and finish quality review. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Tools and materials were checked and ready before work began, demolition and prep were completed without issue, and progress was reviewed with finish quality confirmed on track.

## How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the work day, turned into a homeowner-ready update the same afternoon it was captured.
