

Store Compliance Report

Client: Demo data - privacy protected · Store compliance audit

Visit Date: 28 September 2026, 11:00 AM – 12:10 PM

Generated by: AI report assistant, from a Preserver field export

Summary

A store compliance audit was carried out on-site, covering a shelf and merchandising check, a pricing and promotion check, and an audit checklist review. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Shelf stock and merchandising were checked and confirmed against planogram, pricing and promotional signage were checked and confirmed correct, and the audit checklist was reviewed and signed off complete.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the audit, turned into a head-office-ready report the same morning it was captured.
