

Allied Health Visit Report

Client: Demo data - privacy protected · Home therapy visit
Visit Date: 28 September 2026, 11:10 AM – 11:32 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A routine in-home allied health visit was carried out to review the client's rehabilitation program, covering a strength and exercise adherence check, a mobility aid assessment, and a home-safety walkthrough. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Overall, the client is progressing well with the prescribed exercise program, the walking frame remains in good working order, and one minor home-safety hazard was identified near the hallway. None of the findings were urgent, but each has been flagged for follow-up with the treating team.

Visit Summary

Category	Observation	Status	Action Required
Exercise Program	Resistance band and grip exercises completed as prescribed	On Track	Continue current program
Mobility Aid	Walking frame in good condition, height adjusted correctly	Normal	No action required
Home Safety	Loose mat identified near hallway entry	Attention	Recommend mat removal

Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Exercise equipment — resistance band and grip exerciser

-27.4521, 152.9812 · 28 Sep 2026, 11:14 AM

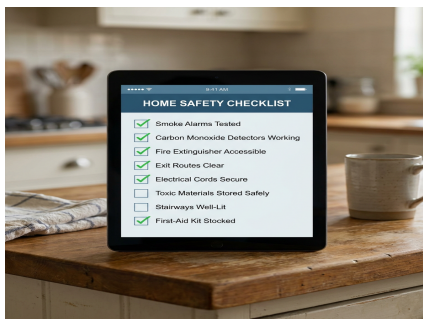

Home exercise kit set out for the session, matching the prescribed strength program.

Mobility aid — walking frame check

-27.4522, 152.9813 · 28 Sep 2026, 11:21 AM

Walking frame inspected for stability and height, confirmed correctly adjusted for the client.

Clinician tablet — home safety checklist

-27.4520, 152.9811 · 28 Sep 2026, 11:27 AM

On-device checklist flagging a loose hallway mat as a minor trip hazard.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
11:14 AM	Voice	"Client completed all three sets of the resistance band exercises today, good form throughout, no reported pain."
11:21 AM	Voice	"Walking frame's in good shape, height's still set correctly. No adjustments needed this visit."
11:27 AM	Text	Loose mat near the hallway entry is a trip risk. Recommend removing or securing it before the next visit.

Site Visit Log

11:10 AM	Activity started on-site — GPS lock confirmed, client residence
11:14 AM	Exercise program — photo + voice observation logged
11:21 AM	Mobility aid check — photo + voice observation logged
11:27 AM	Home safety checklist — photo + text observation logged
11:32 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the visit, turned into a treating-team-ready therapy report the same day it was captured.

Preserver

Free to capture. Record your observations — photo, video, voice or text — with GPS and timestamp on every entry. Export anywhere, including straight to AI. preserver.me
