

Clean Job Completion Report

Client: Demo data - privacy protected · End-of-lease clean
Visit Date: 28 September 2026, 1:10 PM – 1:29 PM
Generated by: AI report assistant, from a Preserver field export

Summary

An end-of-lease clean was carried out across the kitchen, bathroom, and living areas, with each stage checked off against the client's job requirements. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Overall, the kitchen and bathroom were completed to the required standard, and the living area was finished with one minor follow-up item noted for the next visit. The job checklist was completed in full, with the outstanding item flagged for the client.

Job Summary

Category	Observation	Status	Action Required
Kitchen	Benchtops, sink and stovetop cleaned to standard	Complete	No action
Bathroom	Vanity, mirror and sink cleaned and sanitised	Complete	No action
Living Area	Carpet mark noted near window, needs spot treatment	Attention	Schedule spot clean

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the job, turned into a client-ready report the same day it was captured.
