

Childcare Facility Visit Report

Client: Demo data - privacy protected · Facility compliance check

Visit Date: 28 September 2026, 8:15 AM – 8:34 AM

Generated by: AI report assistant, from a Preserver field export

Summary

A routine facility check was carried out at the childcare center, covering the morning attendance sign-in process, the daily activity schedule posting, and a playground equipment safety inspection. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Overall, attendance sign-in procedures were followed correctly, the activity schedule was posted and up to date, and one minor maintenance item was identified on the outdoor play equipment. None of the findings were urgent, but each has been flagged for follow-up with the center director.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the visit, turned into a director-ready compliance report the same day it was captured.
