

Home Health Care Visit Report

Client: Demo data - privacy protected · Residence visit
Visit Date: 28 September 2026, 9:40 AM – 9:58 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A routine in-home care visit was carried out at the client's residence, covering a vital signs check, a medication adherence review, and a mobility and home-safety walkthrough. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Overall, the client's vital signs were within a mildly elevated but stable range, one scheduled medication dose appeared to have been missed mid-week, and a minor home-safety hazard was identified in the hallway. None of the findings were urgent, but each has been flagged for follow-up with the care coordinator.

Visit Summary

Category	Observation	Status	Action Required
Vital Signs	Blood pressure 138/86 — mildly elevated	Monitor	Recheck next visit
Medication Adherence	Weekly organizer — Wednesday slot not taken	Attention	Reminder call scheduled
Mobility & Home Safety	Loose hallway rug, no grab rail in bathroom	Attention	Recommend grab rail install

Field Evidence

The following images and captions were captured directly through the Preserver app during the home visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Vital signs — blood pressure monitor reading

-27.4478, 152.9985 · 28 Sep 2026, 9:42 AM

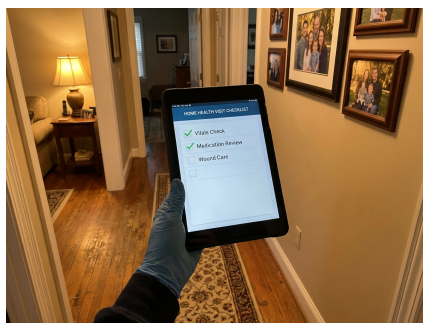

Cuff reading of 138/86, consistent with the client's recent trend, logged against the visit timestamp.

Medication organizer — weekly pill box

-27.4478, 152.9986 · 28 Sep 2026, 9:47 AM

Wednesday compartment still full, indicating a missed mid-week dose. Other days match the prescribed schedule.

Caregiver tablet — home safety checklist

-27.4477, 152.9984 · 28 Sep 2026, 9:53 AM

On-device checklist flagging a loose hallway rug and no bathroom grab rail.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
9:42 AM	Voice	"Blood pressure's a little up again today, one-thirty-eight over eighty-six. Client says they've been sleeping okay, nothing else new to report."
9:47 AM	Voice	"Looks like Wednesday's tablets weren't taken — box is still full for that day. Going to flag this for a reminder call."
9:53 AM	Text	Hallway rug is a trip hazard, and there's no grab rail by the shower. Recommend a home-safety referral.

Site Visit Log

9:40 AM	Activity started on-site — GPS lock confirmed, client residence
9:42 AM	Vital signs — photo + voice observation logged
9:47 AM	Medication check — photo + voice observation logged
9:53 AM	Home safety checklist — photo + text observation logged
9:58 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the home visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the visit, turned into a coordinator-ready report the same day it was captured.
