

Room Turnover Report

Client: Demo data - privacy protected · Guest room turnover check
Visit Date: 28 September 2026, 10:00 AM – 11:10 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A guest room turnover check was carried out on-site, covering a room presentation and set-up check, a linen and amenities check, and a housekeeping quality review. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

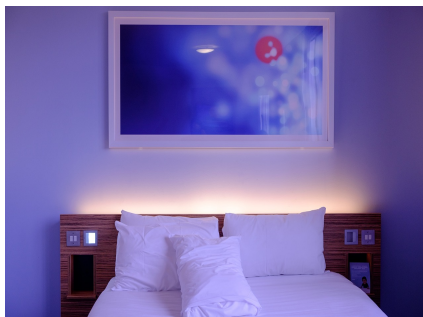

The room presentation and set-up were checked and confirmed ready for the next guest, linen and amenities were checked and confirmed stocked, and the housekeeping quality was reviewed and signed off before check-in.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the turnover, turned into a check-in-ready file the same morning it was captured.
