

Content Delivery Report

Client: Demo data - privacy protected · Copywriting project delivery
Visit Date: 28 September 2026, 9:00 AM – 10:10 AM
Generated by: AI report assistant, from a Preserver field export

Summary

A content delivery session was carried out, covering a brief and research check, a draft and edit review, and a final proof and delivery check. All observations were captured using the Preserver app, with timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

The brief and research notes were checked against the client requirements, the draft was reviewed and edited for tone and accuracy, and the final copy was proofed and confirmed ready for client delivery.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped record of the delivery process, turned into a client-ready file the same morning it was captured.
